Re: Davis Run Floodplain Delineation  
Surveying Services

Dear Mr. Riggs;

The following proposal outlines the professional services we will provide on the above referenced project.

- 1) Cross Sections – We will provide data for the 33 cross-sections per the attached drawing. Each cross section will be oriented perpendicular to the stream and will include data within the main channel only. The cross sections will be obtained by field survey methods. Also a photograph of each section will be included.
- 2) Culvert Surveys - We will provide the data for the 7 culverts per the attached drawing. The survey will include the following:
  - a) Dimensions, shape, length and material
  - b) Inverts
  - c) Cross-sections of the roadway above the culvert
  - d) Photograph of the structure
- 3) Digital Topographic Mapping – We will provide the one-foot contours for the entire watershed between Tylersville Road and Western Row Road. The orthographic photo's can be overlaid to show the planimetrics. The mapping will be produced using aerial photogrammetric methods.

Our fees for this work will be billed on an hourly basis as a total not-to-exceed the following Breakdown:

Items 1 & 2	Cross Sections & Culvert Surveys	\$19,700.00
Item 3	Digital Topographic Mapping	\$16,900.00
Total		\$36,600.00

In addition, we will bill for all out-of-pocket expenses such as blueprints, reproductions, delivery, and mailing charges.

Should you have any questions on any of this, please do not hesitate to call. We look forward to working with you on this project.

Sincerely,

Robert L. Garlock
