A motion to read by title only was made by Councilmember Bradburn, seconded by Councilmember Haake. VOTE: ALL YEAS.

Eric Hansen stated this is not the annual budget for the City of Mason. It is a mechanism of the Tax Budget process the State of Ohio requires to validate receipt of local government funds through the State. The Tax Budget is the mechanism through which Council can annually adjust the property tax rate. A 4.4 millage can be sustained again for 2024. A 4.4 millage is below the 5 mills allowed by Charter, below the previous 5 mill levy amount, and less than neighboring jurisdictions.

The Public Hearing opened at 8:13 p.m.

Lori Shutrump of 5347 Wheatmore said the Gould property should be in the 2024 budget. Eric Hansen said this resolution will set millage for property taxes. The operating budgeting process will begin in the fall. Jeff Forbes said this resolution represents the tax budget and does not identify money set aside for projects.

ORDINANCE 2023-51 AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH PRUS CONSTRUCTION CO. FOR THE ADAPTIVE BALLFIELDS AT MAKINO PARK PROJECT IN THE AMOUNT OF \$1,499,895 AND DECLARING AN EMERGENCY

A motion to read by title only was made by Councilmember Chance, seconded by Councilmember Grossmann. VOTE: ALL YEAS.

Eric Hansen discussed Ordinance 2023-51 and Ordinance 2023-52 together. The Mason Challenger League has been a significant contributor towards campaign and fundraising efforts for the Phase II adaptive fields at Makino Park. The two adaptive fields at Makino Park are designed with a focus on inclusive play. The site-work portion of the project was originally bid in October 2022, which resulted in receiving one bid that was ultimately not awarded. Revisions to plans and bid items were made prior to the project being rebid in February 2023. Changes included condensing the scope of work by reducing the grading and asphalt path limits, listing items such as furnishings, sound components, and landscaping as alternates. In order to stay within the original budget amount, some subsequent items were identified in the base bid scope that could be removed. These modifications reduced base bids from Prus and the Motz Group turf contract. He said fundraising efforts by the Challenger League currently has an approximate gap of \$54,000 to fully fund the \$2,300,000 in contracts. Currently, \$2,246,000 in funding has been raised between state capital grants, Warren County and the City's match, and private donations/contributions from the Mason Challenger League and Mason Parks and Recreation Foundation. Other efforts include grant requests that require construction contracts to be entered into before apply for the funding. Given that the bids will expire on June 5, delaying award could result in having to rebid the project. Eric stated there are alternate items that would be difficult or cost prohibitive to perform later including shade shelters over spectator areas and electrical circuits to add future lighting to the spectator areas. Adding shade shelters in the future would result in the replacement of significant areas of concrete.

ORDINANCE 2023-53 AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH VOGELPOHL FIRE EQUIPMENT FOR THE PURCHASE OF ONE AERIAL PLATFORM LADDER TRUCK IN THE AMOUNT OF \$1,780,000 AND DECLARING AN EMERGENCY

A motion to read by title only was made by Councilmember Bradburn, seconded by Councilmember Styracula. VOTE: ALL YEAS.

Jennifer Heft said the City of Mason Fire Department was created in 1998. In the first few years, the City made significant capital outlays to acquire fire apparatus and ambulances. This created a fire department fleet that aged out of its useful life relatively close together. The City has used creative methods to spread out replacement timeframes so that significant fleet purchases did not need to occur simultaneously. One method was the refurbishment of the City's 1998 aerial platform ladder truck. A significant portion of the mechanical and hydraulic components of this vehicle were replaced in 2018 with the goal of prolonging the useful life of the vehicle for an additional 5 to 7 years while delaying the significant cost of purchasing a replacement vehicle. This type of strategy, coupled with improved fleet management, has extended vehicle life and allowed the vehicle replacement schedule to become more stable and predictable. Typically, when a new apparatus is placed into service, the current apparatus is rotated into a reserve status and used as a backup when other similar apparatus may need to be out for service. In early 2022, staff received information that delivery times for aerial fire apparatus exceeded two years. She stated a staff committee consisting of representatives from the Fire Department and the Service Department was created to review and recommend the best options available on the market today as well as evaluate which apparatus is the best fit for the City's future needs. Staff are recommending a 100-foot aerial platform ladder truck manufactured by E-One. The apparatus will

be equipped with tools needed to carry out firefighting functions. In addition, an aerial platform ladder truck provides various technical rescue and tactical advantages that are required to address the risks that exist within the City and surrounding communities that request mutual aid assistance. She said the truck will meet Insurance Services Office (ISO) and National Fire Protection Association (NFPA) standards. Additional costs will be incurred in future budget years to properly equip the apparatus for emergency response. Delivery times are currently estimated at 33 months. Upon delivery of the new truck, staff intends to maintain the 1998 truck for several more years. Future considerations for a pilot program to operate a third fire apparatus to meet the community's service needs will require the need for an additional fire apparatus in the fleet. An emergency clause has been added to allow for the City to secure a place in line, contain costs, and acquire the new apparatus as soon as possible given the current market conditions.

A motion to suspend the rule and allow for adoption after the first reading was made by Councilmember Grossmann, seconded by Councilmember Haake. VOTE: ALL YEAS.

A motion to read by title only was made by Councilmember Chance, seconded by Councilmember Haake. VOTE: ALL YEAS.

Kurt Seiler said the Hurdzan Golf design included additional tees, increased tee size, bunker deletions/modifications, fairway expansions, and drainage improvements. Construction of The Grizzly golf course has been split into multiple phases to allow construction to occur while maintaining an 18-hole course as well as financing the improvements over several years. A new irrigation system was installed in 2022. This new Improvements Phase 1 includes Holes 4, 5, 6 & 7. Alternate Bid 1 represents the cost to install "Better Billy Bunker" liners in lieu of the fibrous Sandtrapper II liners specified in the Base Bid. Topp Golf Enterprises, Inc. is a local golf industry recognized construction company. Staff, Hurdzan Golf and the Golf Course Committee of Council recommend award of Base Bid and Alternate 1 to Topp Golf Enterprises, Inc.
